The Region 40 (Texas - Dallas) RPC meeting is open to the public. All public safety providers in Region 40 who would use these frequencies are welcome to participate. It is essential that eligible public safety agencies in all areas of government, including state, municipality, county, and Native American Tribal be represented to ensure that each agency's future spectrum needs are considered in the allocation process. Administrators who are not oriented in the communications field should delegate someone with this knowledge to participate and represent their agency's needs.

All interested parties wishing to contribute in planning the use of public safety spectrum in the 700 and 800 MHz bands within Region 40 should participate.
